

DATA HACK 2023 MAKER WORKSHOP: WEB PUBLISHING IN WORDPRESS

Prof. B. Suen
Center for Entrepreneurship
Chinese University of Hong Kong

Today's Agenda

- 1. Use of WordPress CMS for web application development.**
- 2. Overview of the WordPress architecture.**
- 3. Customize data set for more robust data projects.**

Self-paced Learning

Home

Courses

Digital Transformation in Social Services

Strategic Insights and Analytics

New Media Business Model and Innovation

Pre-class Workshop

Introduction to HTML, CSS, and Github

1. A grammar analogy for describing HTML (noun), CSS (adjective), and JavaScript (verb) functions in web development.
2. Deconstruct the DOM (Document Object Model) architecture and the Box Model of HTML elements using the browser inspector (e.g. the Developer Tools under the View menu in Chrome).
3. Make use of HTML5 elements (e.g. header, nav, aside, section, article, and footer) and the “div” tag for composing the web page.
4. Placing elements within the page layout using static, relative, absolute, fixed, and sticky positions.
5. Styling and combining HTML elements with selectors and properties.
6. Understand where to place the styling rules (in-line, internal, or external) to provide instructions to the browser for correctly displaying the web pages.
7. Visual Studio Code is the most popular code editor used by developers. It is free with extensive extension supports. No doubt it has become the first tool most people use to create their HTML/CSS/JS web pages.
8. Git is an indispensable tool for version control. Using Git and Github is

Gutenberg

The image shows a WordPress dashboard with a sidebar on the left containing navigation links like Dashboard, Posts, Media, Pages, Comments, Appearance, Themes, Customize, Widgets, Menus, Kadence, Starter Templates, Theme Editor, Plugins, Users, Tools, Settings, and Collapse menu. The main area displays six theme preview cards. The first card, 'WITH COFFEE', features a woman holding a wooden coffee cup and includes statistics: 23 COFFEE BEAN FLAVORS, 57+ MILLION CUPS OF COFFEE, and 164 THOUSAND LBS OF BEANS. The second card, 'Wooden Craft', shows a dark background with a wooden bowl and the text 'The Best Hardwood Kitchen Utensils'. The third card, 'Leather Shop', has a dark background with leather goods and the text 'CLASSIC & TIMELESS LEATHER GOODS'. The fourth card, 'the gardener.', features a woman holding a bouquet of flowers and the text 'Sustainably grown & lovingly made'. The fifth card, 'seo skills', features a woman and the text 'MARKETING & SEO BEST TRENDS WITH GLORIA OLIVER'. The sixth card, 'BUSINESS COURSES', features a large orange graphic and the text 'Build your better tomorrow'.

Permalink Settings

WordPress offers you the ability to create a custom URL structure for your permalinks and archives. Custom URL structures can improve the aesthetics, usability, and forward-compatibility of your links. A [number of tags are available](#), and here are some examples to get you started.

Common Settings

Select the permalink structure for your website. Including the `%postname%` tag makes links easy to understand, and can help your posts rank higher in search engines.

Permalink structure

- Plain
`https://dev-ssapp.pantheonsite.io/?p=123`
- Day and name
`https://dev-ssapp.pantheonsite.io/2022/12/09/sample-post/`
- Month and name
`https://dev-ssapp.pantheonsite.io/2022/12/sample-post/`
- Numeric
`https://dev-ssapp.pantheonsite.io/archives/123`
- Post name
`https://dev-ssapp.pantheonsite.io/sample-post/`
- Custom Structure
`https://dev-ssapp.pantheonsite.io`

Available tags:

%year% %monthnum% %day% %hour% %minute% %second% %post_id% %postname% %category% %author%

Optional

If you like, you may enter custom structures for your category and tag URLs here. For example, using `topics` as your category base would make your category links like `https://dev-ssapp.pantheonsite.io/topics/uncategorized/`. If you leave these blank the defaults will be used.

Category base

Howdy, admin Help ▾

Discussion Settings

Default post settings

- Attempt to notify any blogs linked to from the post
- Allow link notifications from other blogs (pingbacks and trackbacks) on new posts
- Allow people to submit comments on new posts

Individual posts may override these settings. Changes here will only be applied to new posts.

Other comment settings

- Comment author must fill out name and email
- Users must be registered and logged in to comment
- Automatically close comments on posts older than days
- Show comments cookies opt-in checkbox, allowing comment author cookies to be set
- Enable threaded (nested) comments levels deep
- Break comments into pages with top level comments per page and the page displayed by default

Comments should be displayed with the comments at the top of each page

Email me whenever

- Anyone posts a comment
- A comment is held for moderation

Before a comment appears

- Comment must be manually approved
- Comment author must have a previously approved comment

Comment Moderation

Hold a comment in the queue if it contains or more links. (A common characteristic of comment spam is a large number of hyperlinks.)

When a comment contains any of these words in its content, author name, URL, email, IP address, or browser's user agent string, it will be held in the [moderation queue](#). One word or IP address per line. It will match inside words, so "press" will match "WordPress".

Policy Guide

Privacy Settings

As a website owner, you may need to follow national or international privacy laws. For example, you may need to create and display a Privacy Policy. If you already have a Privacy Policy page, please select it below. If not, please create one.

The new page will include help and suggestions for your Privacy Policy. However, it is your responsibility to use those resources correctly, to provide the information that your Privacy Policy requires, and to keep that information current and accurate.

After your Privacy Policy page is set, you should edit it. You should also review your Privacy Policy from time to time, especially after installing or updating any themes or plugins. There may be changes or new suggested information for you to consider adding to your policy.

[Edit or preview](#) your Privacy Policy page content. Need help putting together your new Privacy Policy page? [Check out our Privacy Policy guide](#) for recommendations on what content to include, along with policies suggested by your plugins and theme.

Create a new Privacy Policy Page

Kadence blocks for later layout design use.

Kadence Blocks

Row Layout Create rows with nested blocks either in columns or as a container. Give style to your rows with background, overlay, padding, etc. Deactivate	Form Create a contact form or marketing form and style it within the block editor. Deactivate	Advanced Gallery Photo galleries, carousels, and sliders! Enable custom links, captions, and more. Plus, you can select image sizes. Deactivate
Advanced Button Create an advanced button or a row of buttons. Style each one including hover controls plus you can use an icon and display them side by side Deactivate	Icon Choose from over 1500+ SVG Icons to add into your page and style the size, colors, background, border, etc. Deactivate	Spacer/Divider Easily create a divider and determine the space around it or just create some space in your content. Deactivate
Advanced Heading Transform your headings to Advanced Headings and customize the font family (even google fonts), color, and size. Deactivate	Tabs Create custom vertical or horizontal tabs with advanced styling controls. Each tab content is an empty canvas able to contain any other blocks. Deactivate	Info Box Create a box link containing an icon or image and optionally a title, description, and learn more text. Style static and hover colors even show a box-shadow. Deactivate
Accordion Create beautiful accordions! Each pane can contain any other block, customize Deactivate	Icon List Add beautiful icons to your lists and make them more engaging. Over 1500 Deactivate	Testimonials Create confidence in your brand or product by showing off beautiful unique Deactivate

The page. It's different from a blog post because it will stay in one place and will show up in your site navigation (in most themes).
with an About page that introduces them to potential site visitors. It might say something like this:
I'm a bike messenger by day, aspiring actor by night, and this is my website. I live in Los Angeles, have a great dog named
I like piña coladas. (And gettin' caught in the rain.)

...or something like this:

The XYZ Doohickey Company was founded in 1971, and has been providing quality doohickeys to the public ever since. Located in Gotham City, XYZ employs over 2,000 people and does all kinds of awesome things for the Gotham community.

As a new WordPress user, you should go to [your dashboard](#) to delete this page and create new pages for your content. Have fun!

https://dev-datahack2023.pantheonsite.io/wp-admin/customize.php?return=%2Fwp-admin%2Fpost.php%3Fpost%3D1%26action%3Dedit%26classic-editor%26classic-editor__forget

The screenshot shows the WordPress Customizer interface. On the left, there's a sidebar with various customization options like Colors & Fonts, Header, Footer, General, Posts/Pages Layout, Search Results, Site Identity, Menus, Widgets, Homepage Settings, and **Additional CSS**, which is highlighted with a red box. The main area displays a sample page with a post titled "Hello world!" under the "Uncategorized" category, posted by "admin" on "February 2, 2023". The post content says, "Welcome to WordPress. This is your first post. Edit or delete it, then start writing!" and includes a "READ MORE →" link. At the bottom of the page, there's a copyright notice: "© 2023 Datahack 2023 - WordPress Theme by [Kadence WP](#)".

Find “Additional CSS” at the bottom of the customise menu.

The screenshot shows the WordPress Customizer interface. On the left, there's a sidebar with a 'Published' button at the top. Below it, under 'Customizing', is a section titled 'Additional CSS'. A note says, 'Add your own CSS code here to customize the appearance and layout of your site.' It includes a link to 'Learn more about CSS'. Below this, instructions for keyboard navigation are provided:

- In the editing area, the Tab key enters a tab character.
- To move away from this area, press the Esc key followed by the Tab key.
- Screen reader users: when in forms mode, you may need to press the Esc key twice.

The note also states that the edit field automatically highlights code syntax. It suggests disabling this in user profile settings to work in plain text mode. At the bottom of the sidebar is a 'Close' button.

The main content area shows a post titled 'Hello world!' in a box with a red border. The post is categorized as 'Uncategorized' and was published on February 2, 2023, by admin. The content of the post is: 'Welcome to WordPress. This is your first post. Edit or delete it, then start writing!'. Below the post is a 'READ MORE →' link. At the bottom of the page, large red text reads: 'Customzied CSS codes can be entered into the area surrounded by the red box on the left.'

At the very bottom, a footer note says: '© 2023 Datahack 2023 - WordPress Theme by Kadence WP.'

The screenshot illustrates a workflow for customizing a WordPress theme's CSS. On the left, the WordPress Customizer interface shows a sidebar with 'Customizing' and 'Additional CSS' sections. The main area displays a sample page with a post titled 'Hello world!' under the 'UNCATEGORIZED' category. The post content includes a welcome message and a 'READ MORE →' link. A red box highlights the class selector '1 .entry-content-wrap' in the Customizer's code editor.

On the right, the Chrome DevTools Elements tab is open, showing the page's DOM structure. A red box highlights the class selector 'entry-content-wrap' within the element style panel, which contains the rule 'border-style: solid;'. The DevTools also show the computed styles for the element, including 'padding: 2rem;' and 'box-sizing: inherit;'.

**Use Chrome inspector
to find the class
selector to be used for
customising the CSS.**

```
<div class="content-container site-container">
  <main id="main" class="site-main" role="main">
    <div id="archive-container" class="content-wrap grid-cols post-archive grid-sm-col-2 grid-lg-col-3 item-image-style-above"> <grid>

Add New Pod [« Back to Manage](#)

1 Create or Extend

2 Configure

Pods are content types that you can customize and define fields for based on your needs. You can choose to create a Custom Post Type, Custom Taxonomy, or Custom Settings Pages for site-specific data. You can also extend existing content types like WP Objects such as Post Types, Taxonomies, Users, or Comments.

Not sure what content type you should use? Check out our [Content Type Comparison](#) to help you decide.

Create New

Create entirely new content types using Post Types, Taxonomies, or Custom Settings Pages.

Extend Existing

Extend any existing content type within WordPress, including Post Types (Posts, Pages, etc), Taxonomies (Categories, Tags, etc), Media, Users, or Comments.

Category All Field Types Tools Integration Migration Advanced

Name	Category	Description
Advanced Content Types	Advanced	A content type that exists outside of the WordPress post and postmeta table and uses custom tables instead. You most likely don't need these and we strongly recommend that you use Custom Post Types or Custom Taxonomies instead. FOR ADVANCED USERS ONLY. Version 2.3 by Pods Framework Team
Advanced Relationships	Advanced	Add advanced relationship objects for relating to including Database Tables, Multisite Networks, Multisite Sites, Themes, Page Templates, Sidebars, Post Type Objects, and Taxonomy Objects Version 2.3 by Pods Framework Team
Builder Integration	Integration	Integration with the Builder theme / child themes from iThemes; Adds new modules to the Layout engine Version 1.0 by Pods Framework Team
Helpers	Advanced	A holdover from Pods 1.x for backwards compatibility purposes, you most likely don't need these and we recommend you use our WP filters and actions instead. Version 2.3 by Pods Framework Team
Markdown Syntax	Field Types	Integration with Markdown (http://michelf.com/projects/php-markdown/); Adds an option to enable Markdown syntax for Paragraph text fields. Version 1.0 by Pods Framework Team
Migrate: Import from the Custom Post Type UI plugin	Migration	Import Custom Post Types and Taxonomies from Custom Post Type UI (http://webdevstudios.com/plugin/custom-post-type-ui/) Version 1.0 by Pods Framework Team
Migrate: Packages	Migration	Import/Export your Pods, Fields, and other settings from any Pods site; Includes an API to Import/Export Packages via PHP Version 2.0 by Pods Framework Team
Pages	Advanced	Creates advanced URL structures using wildcards in order to enable the front-end display of Pods Advanced Content Types. Not recommended for use with other content types. Version 2.3 by Pods Framework Team
Roles and Capabilities	Tools	Create and Manage WordPress User Roles and Capabilities; Uses the 'Members' plugin filters for additional plugin integrations; Portions of code based on the 'Members' plugin by Justin Tadlock Version 1.0 by Pods Framework Team
Table Storage	Advanced	Enable a custom database table for your custom fields on Post Types, Media, Taxonomies, Users, and Comments. Version 2.3 by Pods Framework Team
Templates	Advanced	An easy to use templating engine for Pods. Use {@field_name} magic tags to output values, within your HTML markup. Version 2.3 by Pods Framework Team
Translate Pods Admin	I18n	Allow UI of Pods and fields to be translated. Version 0.2 by Pods Framework Team
